Table of Contents

Introduction	2
Project Objective	6
Merits	6
References	6

Objective:

A Task Management System (TMS) Displays A Calendar for The Desired Week, Month, Or Year. Also, TMS Organizes Personal Tasks of Different Users on A Specific Day. The Users Should Be Able to See Their Individual Calendar Data & Update Them. Your TMS Will Store the Data Of Different User Types In Distinct SQL Tables.

Merits:

TMS eventually results in time savings for users, their clients, and the organization. Time management is essential to attaining these objectives, whether it's enhancing team productivity, making the most of employee time, or expanding a company's availability and profit. Starting to use TMS is a quick and easy method to improve your time management skills.
